

UX Audit

Somers Library - Undergrad Student

Undergrad Student

USC student, late teens/early 20s. Mobility and time are issues in getting to the Library. Not at the Library as frequently. Not sure about topics for research, less directed than grad students. Often here on class assignment, often in a group. Not so familiar with archival research. Comfortable using Internet for searches.

KEY WORDS

- *Mid education level*
- *High level of comfort with technology*
- *Not familiar w/ library procedures*
- *Not a frequent Library user but potential big user of a Library website with content and functionality that meet his needs*

Scenario

- USC undergrad student is writing a paper on black activists in Los Angeles. Because he does not live in New York, he cannot physically obtain the materials so he wishes to access them online or request copies to be sent. Although he is comfortable with using the internet, he is not familiar with using online libraries for research. With the paper due soon, he wants to be able to quickly gather information.
- Red are comments about what the user may be thinking or doing
- Blue are comments about the site format

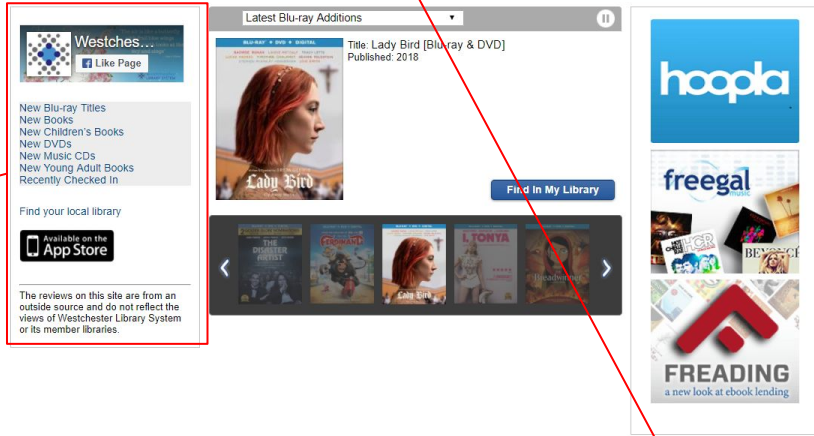

Most of the slides from the graduate student carries over, so I won't include them.
Going to include slides about the catalog that the student might use.

Kind of stands out awkwardly.

Lot simpler header compared to the main website's header (easier to find what you want) and not too many links to the top.

Able to limit search to certain material (children's book, movies, etc), and limit the results to finding the searched phrase in different areas (title, author).

A little bit of social media. Can see new items if a user has been to the library often and doesn't want material they've seen before. Also has an app for the library.

Catalog seems to be on another site as well with a layout that's also pretty different. It's still similar with the empty space on the left and right side with the information only in the center.

Going to search for my topic here.

Each search result has the title of the material with the authors next to it, as well as under.

A short description/summary of the material is included as well as the format depicted by a picture.

The purpose of the "Excerpt" area is not clear (possibly the keywords about the material or region it's found in the library).

The number of the results available for checkout is also shown, allowing users to skip over results with no available material if they want the material now.

You can also place hold on material on the results page.

Not sure what "Text This To Me" does.

The searched words are also highlighted throughout the results, allowing you to see how the words are used within the context of the material.

The science of energy [CD audiobook] : resources and power explained / Michael Wysession.

[CD audiobook]

Wyssession, Michael, author ; lecturer: Teaching Company. Wyssession, Michael, author ; lecturer: Teaching Company.

"Energy is, without a doubt, the very foundation of the universe. It's the engine that powers life and fuels the evolution of human civilization. Yet for all its importance, what energy really is and how it works remains a mystery to most non-scientists. For example: Where does most of our energy come from, and how is it sourced? How do energy technologies, both primitive and cutting-edge, generate power? How do we store energy--and will there be enough to meet our future needs? What are the pros and cons behind the forms of energy currently available to us? How might we harness potential future energy sources such as earthquakes and supervolcanoes? All too often, the answers to questions like these are bogged down in polemics and controversy. Imagine, then, how these and other questions could be discussed from a purely factual, scientific perspective. The truth is, to better put into perspective the various **issues** surrounding energy in the 21st century, you need to understand the essential science behind how energy works. And you need a reliable source whose focus is on giving you the facts you need to form your own educated opinions" -- provided by publisher.
